

HealthTalk

Your journey to better health

What's inside

It's time for your annual flu shot.
Our flu shot location finder makes it easier to find where to get one.
Learn more on page 2.

Covered care

Dr. Chat

Manage your health on the go

Skip the waiting room and chat with a primary care provider (PCP) on UHC Doctor Chat, at no cost to you.

PCPs are available 24 hours a day, 7 days a week and can answer questions big or small. Get the answers, treatment and follow-up care you need, when you need it.

Download the app today on the App Store® or Google Play™ or learn more at UHCDoctorChat.com.

Fight the flu

It's time for your annual flu shot

It is important to get a flu shot every year. It is recommended for everyone 6 months and older.

Here are 3 reasons why:

1. It protects you from getting sick with the flu.
2. If you do get the flu, your symptoms will be less severe.
3. It also protects your family from getting the flu. When everyone gets the flu shot, it makes it harder for the flu to spread.

Get your flu shot today.

There is no cost to you. We have an online tool that makes it easier to schedule one. Visit myuhc.com/findflushot.

Medicaid Renewal

Take action

What you need to do to renew your Medicaid benefits

Medicaid members need to renew their coverage each year. Your state will tell you when its time. They may call it recertification or redetermination.

Make sure the state can reach you when it is time to renew. Give them your current address, email and phone number. It is important to reply when they contact you. If you don't you could lose your health plan.

We're here to help. Learn more at uhc.com/staycovered.

Everyday life

Put down that vape

E-cigarettes are as unhealthy as regular cigarettes. A study found that more than 2.5 million teenagers use e-cigarettes, or vapes. This is about 14% of high schoolers and 3% of middle schoolers. Of those, 1 in 4 vape every day, and 85% use flavored products.

People often think e-cigarettes are safer than regular cigarettes. This is not true. Both contain nicotine, which is addictive. One Juul pod has as much nicotine as a whole pack of cigarettes. E-cigarettes also have toxic chemicals that can damage your child's lungs and brain.

Some vaping devices look like USB drives or pens, making it easier for your child to hide them. Vaping is dangerous for adults, too. While it has some of the same long-term risks as cigarettes, it can also cause sudden lung damage in people of any age. This can be permanent or deadly.

Follow up—don't fall behind

You feel healthy and you're up to date on vaccines. So why not skip a routine exam? While it may not seem like a big deal, missing yearly well-child checkups can lead to problems.

Your primary care provider (PCP) knows your health history, habits and personality. These checkups allow your PCP to notice changes in your health and catch small issues before they turn into big ones.

After your well-child checkup, be sure to check back for:

A follow-up appointment, if needed

To be on the safe side, your PCP may order other exams, like screening for mood or behavioral health problems, based on your family history or other risk factors. Or your PCP might suggest that you get nutrition counseling.

The next scheduled visit

Your PCP may need to see you more often than once a year. Some conditions, such as asthma, ADHD and weight problems, mean you need regular and more frequent visits. These visits are important, too.

Any new health problem that comes up

Your PCP is just a phone call away. If you have questions or concerns, give your PCP a call today and schedule your appointment! You don't have to wait until your next visit to check back in. If you need help making an appointment, call Customer Service at 1-800-690-1606.

Finding the right treatment for ADHD

If your child has attention deficit hyperactivity disorder (ADHD), their provider may suggest medication. There are several kinds of medicines that treat ADHD.

Your child may need to change medicines or dosages a few times. Some medicines may not help, others may cause side effects. A dose may be too low or too high. That's why children on ADHD medicine need to see their doctors often.

Be sure to keep regular appointments with their provider. Behavioral therapy and counseling can also help.

Transitions of care

Follow-up care is important

What to do after getting home from the hospital

The time immediately following a hospitalization or emergency room visit can be overwhelming. Take these steps to help ease this transition:

1. Understand your discharge instructions. Your nurse or provider should review these with you before you leave the hospital. Ask questions about anything you don't understand.
2. Fill any new prescriptions. While at the pharmacy, ask the pharmacist to review your entire list of medications for any possible drug interactions.
3. Make a follow-up appointment with your Primary Care Provider (PCP) or behavioral health provider within 7 days following your discharge. Bring a copy of your discharge instructions and a list of any new medications prescribed to you.

Ask for support. Many people need extra help during this time. Asking for support from others may be just what you need for a speedy recovery.

If you need help scheduling a follow-up appointment, please call the Member Services number toll-free at the number on page 8.

Everyday life

Sharing your child's Individual Education Plan (IEP)

Why is a release form needed?

UnitedHealthcare can access your child's information when you sign the release. This helps to manage care for your child better.

Why is it important?

- UnitedHealthcare can talk to your child's school and all the different people providing services to be sure your child has everything they need.
- Also, your child's school can call us to confirm if they have TennCare and coordinate services they get in the school.

Who else may have access if I sign the release form?

If you sign the release form, UnitedHealthcare can talk to the school system and your child's PCP about their care.

How long does the release form last?

The release is on file for as long as your child gets services in the school or until you request to remove it.

Membership, benefits and plan details

You can view and download your Member Handbook anytime, anywhere, by visiting myuhc.com/communityplan.

Want a printed copy? Call Member Services at **1-866-600-4985**, TTY **711** to ask for the Member Handbook to be mailed to you.

Our Quality Management Program

UnitedHealthcare Community Plan wants you to get the best care and service. That’s why we have a Quality Management (QM) program. Our QM program helps us learn what we can do better. Then we use it to improve. Our QM program has several member health programs.

These programs:

- help people with health conditions like asthma, diabetes, heart disease, depression, bipolar disorder and schizophrenia.
- help pregnant women have healthy babies.
- help people stay healthy with shots, screenings, and tests.
- improve patient safety.
- make sure members are happy with the plan.
- make sure doctors and other health care professionals meet our standards.

We use national standards to see how well our QM program works. The National Committee for Quality Assurance (NCQA) writes the standards. NCQA is an independent agency. It compares the quality programs of health plans. We measure our progress in meeting our goals using NCQA’s Healthcare Effectiveness Data and Information Set (HEDIS®) Consumer Assessment of Healthcare Providers & Systems (CAHPS®) HEDIS® and CAHPS® results are given in a national report card. Below you will find our 2023 TennCare HEDIS® and CAHPS® highlights. The box compares our results to national averages:

2023 Adult CAHPS® Highlights
